

ItsYourTurn Rules

1. Go to the site: www.itsyourturn.com
2. Create a free account
 - this will be **your** account so choose your username and password wisely
 - a free account allows you to play up to 20 games simultaneously and make up to 15 moves per day. This should be plenty.
3. Once you have an account, you will challenge me (docfleetwood) in a game (see below)
 - put your real name in the challenge 'message' since I may not recognize your username
 - do not choose the 2-game match option – that will be too many games for me!
4. You will also challenge 3 different classmates – each in a different game. (this will give you 4 total games)
 - you must choose only one game from each category (see below)
 - games should be set for a 7 day/move time limit
 - you may choose the 2-game match option if you wish
5. After you read the game rules, but **before** you start playing each game, you should write down what your strategy will be to win the game.
6. As you play the game you should write down new strategy ideas you develop or lessons you learn
7. When you are finished the game, you should write down the strategies and ideas you will employ the next time you play.
8. When you are finished all 4 of your games, choose one to work on and get better at
 - play that game as many times as you can
 - you may play your classmates or any other people on the site (**never give any personal information to anyone online!**)
 - keep notes on whether or not your new strategy works and ideas to improve your play
9. This is your account, and as long as it doesn't interfere with this assignment, you may also play any of the games you want against whomever you choose. Remember, you are limited in the number of games and moves you can make in a day. **And remember to be smart with online safety.**

The Games

Category 1	Category 2	Category 3	Category 4
Chess *	Lines of action *	Stack 4	Rush sabotage
